Public Policy Update

Things That Might Have Impact

Marco Hogewoning | 14 May 2020 | RIPE 80 IoT Working Group

Review of EU ePrivacy Directive

- Works in conjunction with GDPR
- Builds on the Telecoms Directive
- Aims to ensure all communications over public networks respect fundamental rights
 - Previous version introduced the cookie consent
 - Review to bring it in line with GDPR and today's reality
- Will likely impact a broad range of IoT technologies and systems

Data Mobility and Ownership

- Focuses on the age old question of who owns the data
- What happens if you change service provider or manufacturer?
 - Can you take your data with you?
 - How to make sure it is compatible?
- The really big question is about AI and what it learned
 - Can you prevent the need to retrain when you change provider?
- This is a big driver for standardisation
